

MERCHROOM E-COMMERCE SYSTEM ARCHITECTURE

Current modular monolith, controlled agentic AI, and explicitly marked planned production improvements

CURRENT

PLANNED

SECURITY BOUNDARY

Vercel Web

CURRENT

React SPA; /api rewrite to Render

Render API

CURRENT

Express runtime and environment

MongoDB Atlas

CURRENT

Managed persistence and backup

CI/CD Pipeline

PLANNED

Lint, build, test and deploy automation

Observability

PLANNED

Logs, metrics, traces and alerts

Security Controls

PLANNED

CSRF, refresh rotation and signed cookies

Configured hosting plus explicitly planned production controls

Architecture verified against the current MERCHROOM repository. Dashed components are planned; CURRENT means code or deployment configuration exists.
